

# BLACKFIVE VALVES

## Series 11 Air Operated Pipeline Sampling Valve

### INTRODUCTION

The Series 11 valves have been developed to provide a simple air operated to open with spring return to close automatic feature of the standard pipeline sampling valve for installing into overhead and difficult to access pipelines.

### INSTALLATION

The valves can be installed and used on vertical or horizontal pipelines from 1" NB up to 3" NB with ASA 150 flanges to BS 1560 ( ANSI B16.5 )

An adaptor can be provided to route the sample down through PTFE pipework to either an easily accessible sample collection point or a bottle in a lockable stainless steel cabinet.

### OPERATION

A simple push button can be provided to operate the valve with press to open and release to close.
