

Series 10 Lever Operated Pipeline Sampling Valves

INTRODUCTION

The Series 10 valves have been developed to provide a simple lever operated with spring return feature of the standard pipeline sampling valve.

INSTALLATION

The valves can be installed and used on vertical or horizontal pipelines from 1" NB up to 3" NB with ASA 150 flanges to BS 1560 (ANSI B16.5)

OPERATION

To operate the lever is depressed and upon release the valve automatically closes.

Facilities are available to lock the valves in the closed position and also to limit the rate of flow when opening the valve also lockable SS cabinets are available.
